powerWALL 

PowerWall is a cost effective, flexible power distribution and control system for today's industrial requirements.

Contact us today and let us design a PowerWall that fits your needs..

Why PowerWall?

- Single source supplier simplifies switchgear procurement and code compliant controls to streamline construction, startup and operations.
- PowerWall® units incorporate industrial grade components that are pre-assembled, pre-wired and tested in a factory-controlled environment, UL 508 & 891 Listed.
- Wide range of cabinet designs offer more flexibility and reduce wall space by 30%+.
- Multiple designs of unit enclosures allow for either indoor location or weatherproof (Type 3R rated) outdoor installation.
- Support during project design, construction, startup and maintenance.
- Unique interfaces for quick connections to mobile generators.
- All subsystem controls available as standalone units for retrofits to maintain same control consistently to all locations.

Benefits Inside.

- Compact design can be placed in out of the way locations to maximize space for other uses.
- Optional power quality offerings for POS network and critical electronics (TVSS & UPS systems).
- Optional building management system is scalable to meet your requirements.
