NOTES

- "---" indicates the feature is not an option for this case model and/or the data is not yet available.
- · Load data represents the sum of both coils.
- Listed evaporator temperature represents unlighted shelves.
- · BTUH load increases by 132 BTUH/ft when aftermarket merchandising accessories are utilized.
- · Listed discharge air velocity represents the average velocity at the peak of defrost.
- Temperature and defrost settings listed above are recommended start-up settings. Final operational settings may need to be adjusted for the store conditions in which the case operates.
- The recommended evaporator temperatures may need to be adjusted based on system setup, store conditions, etc.
- The minimum recommended evaporator temperature is 4°F below the listed evaporator temperature.
- Medium Temp application is run in dual temp mode only.
- · Not intended for frozen juice application.
